**Dear valued customer,**

**REACH Compliance of Lucite® Diakon®, Elvakon® and Tufcoat™ Polymer products manufactured at Lucite International Holland B.V., Rozenburg NL**

The EU REACH regulation (Regulation No. 1907/2006) requires that substances manufactured or imported to the EU are pre-registered or registered after the 1<sup>st</sup> of December 2008. The above products are polymers manufactured by Lucite International and as such the bound monomers and additives are subject to REACH registration.

Lucite International has ensured that all the above products sold to our EU and EEA customers by Lucite International are in compliance with REACH regulatory requirements including pre-registration and registration. Registrations have been completed for all substances due in 2010 and 2013. Any additional registrations will be completed or confirmed within the supply chain before the required dates in 2018. Whilst the monomer registration numbers are being made available on the substance safety datasheets Lucite International does not intend to communicate additional pre-registration numbers based on the guidance in CEFIC REACH Industry Preparation Letter No 9.

We have also completed a review of our raw materials against the current candidate list of substances of high concern (SVHC), as published on the ECHA website on the 7th of July 2017. Whilst this list is continually subject to review, to our current knowledge none of these products contain any of these substances. Lucite will continue to monitor this situation and inform customers of any changes or developments.

Lucite International is positioned well to respond to REACH and has undertaken an extensive process to ensure that the implementation of the REACH regulation will have no negative impact on our product range.

If you should have any further questions, or would like any additional information including details of the potential to support Lucite International materials contained within the products you manufacture or supply, please do not hesitate to discuss these with your local sales and customer service representatives or contact us via the e-mail address below.

Yours sincerely

Ron Nuytemans
